CONTENTS OF VOLUME 111

NUMBER 1, FEBRUARY 1981

REVIEW

- Application of Monoclonal Antibody Techniques to Biochemical Research
George S. Eisenbarth 1

CARBOHYDRATES

- Characterization by Gas-Liquid Chromatography-Mass Spectrometry of Oligosaccharides Resulting from the Hydrazinolysis-Nitrous Acid Deamination Reaction of Glycopeptides
Gérard Strecker, Annick Pierce-Cretel, Bernard Fournet, Geneviève Spik, and Jean Montreuil 17
- Radiometric Assay for Minute Quantities of L-Fucose
Deborah Shuey Grove and George S. Serif 122

CELL CULTURE

- A Procedure for the Preparation of Chromatin and Chromatin Proteins from Cultured Mammalian Epithelial Cells
Garry John Smith 97

CHROMATOGRAPHIC AND ELECTROPHORETIC TECHNIQUES

- A Simple and Rapid Method for the Quantitative Isolation of Proteins from Polyacrylamide Gels
M. Otto and Maja Šnejdárková 111
- High-Performance Liquid Chromatography of Proteins by Gel Permeation Chromatography
Robert A. Jenik and John W. Porter 184

ENZYMATIC ASSAYS AND ANALYSES

- A Straightforward Method for the Simultaneous Preparation of Radiolabeled L-Dihydroörotic and N-Carbamyl-L-Aspartic Acids
Thomas W. Kensler, Nyun Han, and David A. Cooney 49
- A Simple Radioisotopic Assay for Nucleoside Kinases Employing Alumina for Separation of Nucleosides and Nucleotides
Mahmoud H. el Kouni and Sungman Cha 67
- Enzymatic Determination of Betaine in Rat Tissues
John J. Martin and James D. Finkelstein 72
- Sensitive Enzyme Assays Based on the Production of Chemiluminescent Leaving Groups
Bruce R. Branchini, Jeffrey D. Hermes, Francesco G. Salituro, Nancy J. Post, and Göran Claeson 87
- A Simple, Specific, Radioenzymatic Assay for Picogram Quantities of Serotonin or Acetylserotonin in Biological Fluids and Tissues
M. Nasir Hussain and Michael J. Sole 105
- A Sensitive Method for Determination of Biphenyl Hydroxylase Activities Using High-Performance Liquid Chromatography
Y. Yamazoe, T. Kamataki, and R. Kato 126

- A Rapid and Sensitive Colorimetric Assay of Amine Oxidase
B. I. Naik, R. G. Goswani, and S. K. Srivastava 146
- Rapid and Reliable Identification of "Casein Kinases TS" in Many Tissues by Means of a New Specific and Very Suitable Model Substrate
Flavio Meggio, Arianna Donella-Deana, and Lorenzo A. Pinna 158
- Synthesis and Use of *p*-Nitrophenyl-2-*O*-(α -L-Fucopyranosyl)- β -D-Galactopyranoside for the Rapid Detection of Substrate-Specific α -L-Fucosidases
Richard A. DiCioccio, Conrad Piskorz, Georgia Salamida, Joseph J. Barlow, and Khushi L. Matta 176
- A Simple and Continuous Assay for Decarboxylase Activity Using a Carbon Dioxide-Selective Electrode
Domenica Tonelli, Rolando Budini, Enrico Gattavecchia, and Stefano Girotti 189

INSTRUMENTATION

- An Improved Procedure for ^{15}N Determination by Emission Spectrometry
Masayuki Ohmori, Hitoshi Iizumi, and Akihiko Hattori 83

LIPIDS AND LIPOPROTEINS

- Enzymatic Preparation of Carboxyl Oxygen-18 Labeled Prostaglandin F 2α and Utility for Quantitative Mass Spectrometry
Walter C. Pickett and Robert C. Murphy 115
- Improved Techniques for the Separation of Serum Lipoproteins by Density Gradient Ultracentrifugation: Visualization of Prestaining and Rapid Separation of Serum Lipoproteins from Small Volumes of Serum
Anthony H. M. Terpstra, Christopher J. H. Woodward and Francisco J. Sanchez-Muniz 149

MEMBRANES AND RECEPTORS

- Solubilization of Muscarinic Acetylcholine Receptors from Mammalian Brain: An Analytical Approach
Hugo Gorissen, Gustaaf Aerts, Brigitte Ilien, and Pierre Laduron 33

METABOLITE DETERMINATION

- A Rapid Procedure for Detection of Bacterial Amino Acid Decarboxylases
Kirk C. S. Chen and King K. Holmes 60

NUCLEIC ACIDS AND PROTEIN SYNTHESIS

- Determination of Malondialdehyde-DNA Crosslinks by Fluorescence and Incorporation of Tritium
Frank W. Summerfield and Al L. Tappel 77

PEPTIDES, AMINO ACIDS, AND AMINO ACID DERIVATIVES

- Rapid Separation of Amino Acid Phenylthiohydantoin by Isocratic High-Performance Liquid Chromatography
G. E. Tarr 27
- The Use of Immobilized Glutamate Dehydrogenase to Synthesize ^{13}N -Labeled L-Amino Acids
Arthur J. L. Cooper and Alan S. Gelbard 42

Specific Colorimetric Detection of <i>o</i> -Diphenols and 3,4-Dihydroxyphenylalanine-Containing Peptides	<i>J. H. Waite and M. L. Tanzer</i>	131
Glass Capillary Gas-Chromatographic Analysis of Free Amino Acids in Biological Microenvironments Using Electron Capture or Selected Ion-Monitoring Detection	<i>Göran Bengtsson, Göran Odham, and Gunilla Westerdahl</i>	163

PURIFICATION OF ENZYMES AND PROTEINS

Human Epidermal Growth Factor/Urogastrone: Rapid Purification Procedure and Partial Characterization	<i>C. Richard Savage, Jr. and Robert Harper</i>	195
--	---	-----

SPECIAL TECHNIQUES

Targeted Liposomes: A Method for Preparation and Analysis	<i>Vilma K. Jansons and Patricia L. Mallett</i>	54
---	---	----

SUBCELLULAR FRACTIONS AND SEPARATION

Isolation of a Polydisperse High-Molecular-Weight Glycogen from Rat Liver	<i>Doris M. Haverstick and Alvin H. Gold</i>	137
---	--	-----

NUMBER 2, MARCH 1, 1981

CHROMATOGRAPHIC AND ELECTROPHORETIC TECHNIQUES

Measurements of the Degradation Products of Radioiodinated Proteins	<i>Guy M. Chisolm, III, Cathy A. Sila, and S. Paul Hmiel</i>	212
Quantitative Analysis of Electrophoretograms: A Mathematical Approach to Super-Resolution	<i>D. A. Agard, R. A. Steinberg, and R. M. Stroud</i>	257
High-Performance Liquid Chromatography of Porphyrin Esters. Identification of Mixed Esters Generated in Sample Preparation	<i>James G. Straka, James P. Kushner, and Bruce F. Burnham</i>	269

ENZYMATIC ASSAYS AND ANALYSES

An Overall Radioassay for the First Three Reactions of <i>de Novo</i> Pyrimidine Biosynthesis	<i>Richard I. Christopherson, Mai-Lein Yu, and Mary Ellen Jones</i>	240
Radial Caseinolysis in Agarose: A Simple Method for Detection of Plasminogen Activator in the Presence of Inhibitory Substances and Serum	<i>Olli Saksela</i>	276
Deviations from Michaelis-Menten Kinetics in Continuous Flow Assays: Consideration of Unireactant Cases	<i>Maurice R. Eftink, Robert E. Johnson, and Rodney L. Biltonen</i>	291
The Application of Flow Microcalorimetry to the Study of Enzyme Kinetics	<i>Maurice R. Eftink, Robert E. Johnson, and Rodney L. Biltonen</i>	305
Sensitive and Fast Simultaneous Photometric Determination of Oxygen Consumption and NAD(P)H Formation or Disappearance Using a Continuous Flow Cuvette	<i>M. Dânsoreanu, M. Telia, C. Tărmure, M. Oargă, M. Markert, A. Ivanof, and O. Bârzu</i>	321
A Rapid and Sensitive Assay of ADPglucose Pyrophosphorylase Using Luciferase	<i>Te May Ching</i>	327

- Effect of a Dispersion of Cholesterol in Triton WR-1339 on Acyl CoA: Cholesterol
Acyltransferase in Rat Liver Microsomes
Jeffrey T. Billheimer, Deebanne Tavani, and William R. Nes 331

HORMONES

- A Rapid Partition Assay for Routine Analysis of Juvenile Hormone Release by Insect
Corpora Allata
René Feyereisen and Stephen S. Tobe 372

IMMUNOLOGICAL PROCEDURES

- Isoelectric Focusing Analysis of Soluble Immune Complexes Bound to Protein A-
Sephadex
*Bert W. Maidment, Jr., Lawrence D. Papsidero,
Marie Gamarra, Takuma Nemoto, and T. Ming Chu* 336
- Multiple Immunoreplica Technique: Screening for Specific Proteins with a Series of
Different Antibodies Using One Polyacrylamide Gel
Roman P. Legocki and Desh Pal S. Verma 385

LIPIDS AND LIPOPROTEINS

- Analytical Prenyl Pigment Separation from a Total Green-Plant Lipid Extract
David R. Janero and R. Barnett 283

METABOLITE DETERMINATION

- The Separation of the Isomeric Phenols of Benzo(a)Pyrene by High-Performance
Liquid Chromatography
Elsayed A. Elnenaey and W. Peter Schoor 393

NUCLEIC ACIDS AND PROTEIN SYNTHESIS

- Molecular Weight Determination of Glyoxalated RNA by Sedimentation Centrifuga-
tion
*Micheal A. Nash, Marjorie Johnson, John E. Knesek, James C. Chan,
and James L. East* 376

PEPTIDES, AMINO ACIDS, AND AMINO ACID DERIVATIVES

- Analysis of Biological Thiols: Quantitative Determination of Thiols at the Picomole
Level Based upon Derivatization with Monobromobimanes and Separation by
Cation-Exchange Chromatography
Robert C. Fahey, Gerald L. Newton, Randel Dorian, and Edward M. Kosower 357

PHYSICAL TECHNIQUES

- A New Method for Determining the Dissociation Constant between Macromolecules
by Gel Permeation
Genichiro Oshima, Hideki Uchiyama, and Kinzo Nagasawa 366

PROTEIN ANALYSES AND REAGENTS

- Colorimetric Determination of Arginine Residues in Proteins by *p*-Nitrophenylglyoxal
R. Bryan Yamasaki, Dorothy A. Shimer, and Robert E. Feeney 220

Fluorescent Gels as a General Technique for Characterizing Bacterial <i>c</i> -Type Cytochromes	<i>Paul M. Wood</i>	235
Initial Isolation and Stabilization of Aequorin Luminescent Activity from the Jellyfish, <i>Aequorea forskalea</i>	<i>Edmundo Casillas, Vicky M. Brautigan, and Margaret Kenny</i>	250
Fluorometric Identification and Microdetermination of Proteins Labeled with 4-(3'-Phenyl-2'-pyrazolin-1'-yl)benzenesulfonyl Chloride in Polyacrylamide Gel Matrices	<i>Mandla A. Tshabalala and Howard W. Latz</i>	343

PURIFICATION OF ENZYMES AND PROTEINS

Purification of Human Serum Angiotensin I-Converting Enzyme by Affinity Chromatography	<i>Robert B. Harris, John T. Ohlsson, and Irwin B. Wilson</i>	227
--	---	-----

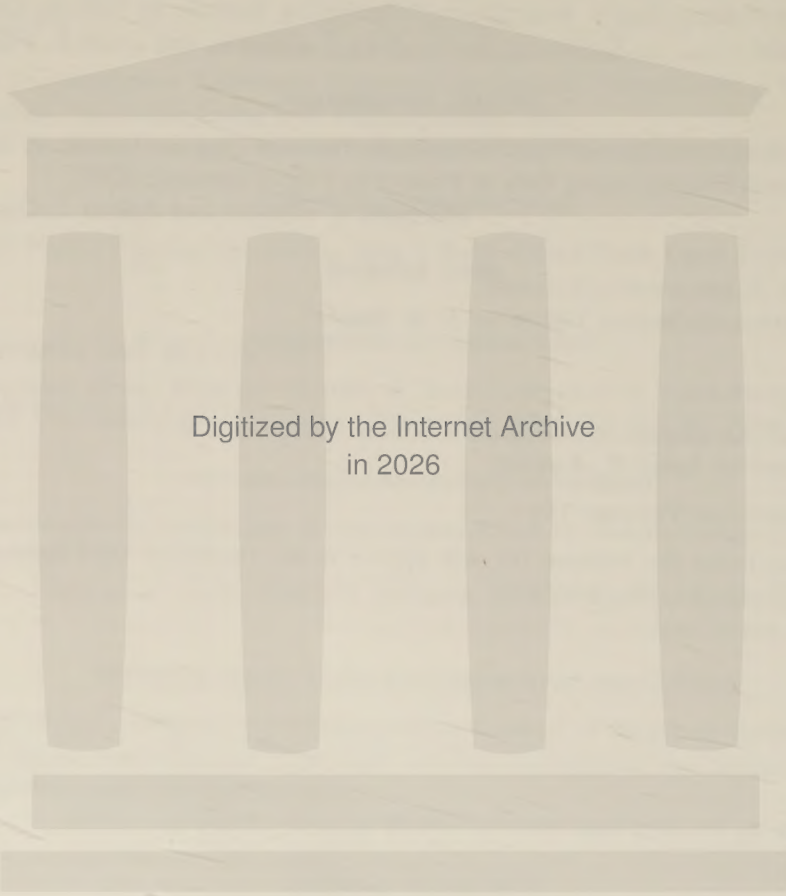

SPECIAL TECHNIQUES

Sensitive and Rapid Analysis of T1-Ribonuclease-Resistant Oligonucleotides in Two-Dimensional Fingerprinting Gels of Poliovirus Type I Genomic RNA	<i>Margaret L. Stewart and Robert J. Crouch</i>	203
--	---	-----

BOOK REVIEWS

<i>Biological Microcalorimetry</i> , Edited by A. E. Beezer	Reviewed by <i>Neal Langerman</i>	401
Briefly Noted		
<i>Advanced Techniques in Biological Electron Microscopy II</i>		
Edited by James K. Koehler		402
AUTHOR INDEX FOR VOLUME 111		403

The Subject Index for Volume 111 will appear in the December 1981 issue as part of a cumulative index for the year 1981.

INFORMATION FOR AUTHORS¹

Analytical Biochemistry will publish articles on methods of interest to the biochemical sciences and all fields that impinge on biochemical investigation, including those areas of immunology that include analytical and preparative methods for application by biochemists, cell and tissue culture techniques, and purification methods for specific enzymes and other proteins when such work has resulted in a high level of purity. Areas such as methods for sequencing and synthesizing DNA and RNA will be included. Invited review articles dealing with timely topics in methodology will also be published. In addition, book reviews covering titles directly related to the scope of the Journal and, specifically, to analytical and preparative methods in biochemistry and such impinging fields as immunology and tissue culture, will be published.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Analytical Biochemistry* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Address. Manuscripts should be submitted to **Analytical Biochemistry, Editorial Office, 111 Fifth Avenue, New York, N. Y. 10003.**

Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. At least three copies should be submitted, each copy to include all figures (originals or glossy prints) and tables. The original copy must be typewritten, double-spaced, on one side of white bond paper, about $8\frac{1}{2} \times 11$ inches in size, with one-inch margins on all sides. Each manuscript should have a separate title page noting title of article, authors' names (without degrees), a running title (not exceeding 35 letters and spaces), an abstract (50–150 words), and the address to which proof should be mailed. **Also, on the title page, authors should indicate the appropriate subject category for listing in the Table of Contents.** Please number all pages of the manuscript.

Names of chemical or organic substances should follow the recommendations of the IUPAC–IUB Combined Commission on Biochemical Nomenclature (CBN) as published in the extended Information for Authors, appearing in the first issue of each year of this journal.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

Figures should be numbered consecutively with Arabic numerals in order of mention in the text; each figure should have a descriptive legend. Legends should be typed together on a separate sheet, double-spaced. All illustrations should be in finished form ready for the engraver. A convenient size for drawings is $8\frac{1}{2} \times 11$ inches (21×27.5 cm). Drawings should be made with India ink on tracing linen, smooth surface white paper, or Bristol board. Graph paper if used should be ruled in blue. Grid lines that are to show in the final engraving should be inked in black. Glossy prints properly prepared are acceptable.

¹ An extended Information for Authors will be published in an early 1981 issue. Reprints are available from the Editorial Office. Authors should consult this Information for details on nomenclature, IUPAC–IUB rules and recommendations, and accepted abbreviations.

Proofs. Galley proofs will be sent to the authors with reprint order forms. Fifty reprints of each article are provided free of charge. Additional reprints may be ordered on the form provided.

Photographs must be kept to a minimum and should be glossy prints with strong contrasts; the magnification should be indicated by a scale where possible.

Tables should be typed on separate pages, numbered consecutively with Arabic numerals in order of mention in the text. All tables should have descriptive headings, typed (double-spaced) above the table.

Footnotes should be designated in text by superscript numbers and listed on a separate sheet; in tables, by superscript letters and placed at the bottom of the page containing the table.

References to the literature should be cited in the text by Arabic numerals in parentheses and listed at the end of the paper in consecutive order. Abbreviations of journal titles should follow the style used in Chemical Abstracts' *Service Source Index* (1969 Edition). Please note style of capitalization and punctuation for journal articles and edited books in the following examples:

1. Jones, J. B., Dilworth, G. L., and Stadtman, T. C. (1979) *Arch. Biochem. Biophys.* **125**, 255-260.
2. Metzler, D. E. (1977) *Biochemistry: The Chemical Reaction of Living Cells*, p. 298, Academic Press, New York.
3. Harrington, W. F. (1979) in *The Proteins* (Neurath, H., and Hill, R. L., eds.), Vol. 4, pp. 246-409, Academic Press, New York.
